Automatic grape picking

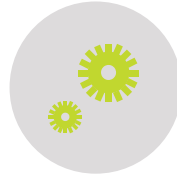

Pluckr, for convenience and healthy grape snacking

Healthy Snacking

Fresh grapes and berries are tasty and healthy snacks. With Pluckr it is now possible to shake the grapes and berries loose for easier packing and snacking.

Technical Benefits

Picking grapes and berries manually takes a lot of time, making it very cost inefficient. The Pluckr is the first device that automatically picks grapes and berries without damaging the fruit up to 300-600 kg per hour.

Packaging (AMAP)

Packing the picked berries and grapes in a sealed tray or cup in combination with the AMAP technology can increase the shelf life up to 4 weeks. AMAP technology adjusts the packaging to the respiration rate of the fruit inside.

Specifications

- 3 or 4 heads version
- 300-600 kg grapes per hour
- Vibration time adjustable per second
- Automatic and semi-automatic operation
- Material: Stainless steel
- Hygienic Design by EHEDG guidelines
- Dimensions: W1470 mm x D780 mm x H2075 mm
- Max. 9 kW
- Optional: sorting conveyor belt
